

# The Employment Situation in Connecticut

## June 2022

Patrick R. O'Brien, Ph.D.  
Research and Policy Interim Director

### Summary

In June 2022, **nonfarm employment** in Connecticut increased by 1,700 jobs, and the May estimate was revised upward by 800 jobs, putting the shortfall since the start of the pandemic-induced recession in February 2020 at 48,000 jobs. Based on an average monthly increase of 2,533 jobs over the past six months, Connecticut is on track to close its job shortfall in January 2024, a faster recovery compared to last month's projection of June 2024 but a slower recovery compared to the current projection of August 2022 for the U.S. as a whole.

In June 2022, employment in Connecticut increased in the following major sectors: **local government** (700 jobs), **state government** (100 jobs), **manufacturing** (600 jobs), **trade, transportation, and utilities** (300 jobs), **financial activities** (100 jobs), **professional and business services** (1,300 jobs), and **education and health services** (700 jobs). Employment in Connecticut decreased in the following major sectors: **construction** (-1,800 jobs), **information** (-100 jobs), and **leisure and hospitality** (-200 jobs).

Since the start of the pandemic-induced recession in February 2020, employment in Connecticut has increased in the following major sectors: **trade, transportation, and utilities** (2,400 jobs), and **professional and business services** (1,800). Employment in Connecticut has decreased in the following major sectors: **local government** (-8,800 jobs), **state government** (-4,100 jobs), **federal government** (-300 jobs), **construction** (-200 jobs), **manufacturing** (-1,200 jobs), **information** (-1,200 jobs), **financial activities** (-3,300 jobs), **education and health services** (-15,900 jobs), **leisure and hospitality** (-12,100 jobs), and **other services** (-5,000 jobs).

The **labor force participation rate** in Connecticut was 64.6 percent in June 2022, up from 64.4 percent in May 2022, but still down from 66.9 percent in February 2020. The labor force participation rate in June 2022 was highest for workers in the following major demographic groups: **men** (70.1 percent), **white** (64.9 percent), **Hispanic or Latino/a/x** (64.6 percent), **20 to 24 years old** (66.9 percent), and **25 to 54 years old** (86.1 percent). The labor force participation rate was lowest for workers in the following major demographic groups: **women** (59.5 percent), **Black** (63.4 percent), **Asian** (62.7 percent), **16 to 19 years old** (34.6 percent), and **55 years old and over** (42.1 percent).

The **employment-population ratio** in Connecticut was 62 percent in June 2022, up from 61.8 percent in May 2022, but still down from 64.6 percent in February 2020. The employment-population ratio in June 2022 was highest for workers in the following demographic groups: **men** (67 percent), **white**

(62.7 percent), and **25 to 54 years old** (83.5 percent). The employment-population ratio was lowest for workers in the following major demographic groups: **women** (57.4 percent), **Black** (58.9 percent), **Asian** (60 percent), **Hispanic or Latino/a/x** (60.9 percent), **16 to 19 years old** (29.7 percent), **20 to 24 years old** (59.2 percent), and **55 years old and over** (40.9 percent).

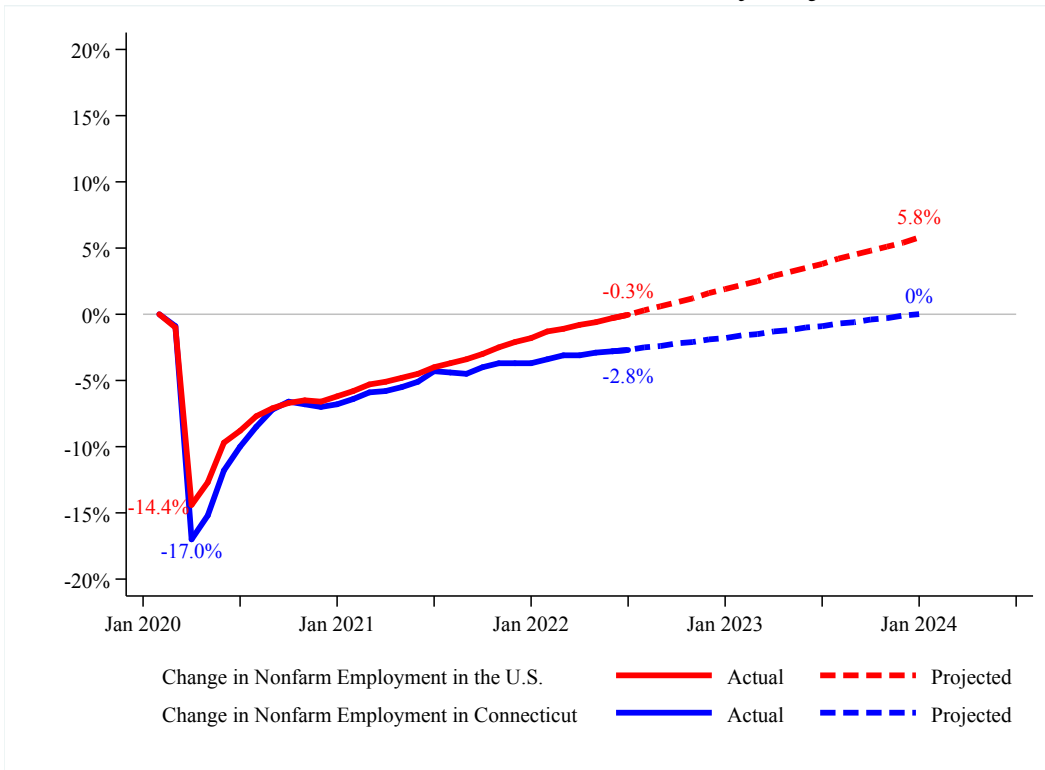

The **unemployment rate** in Connecticut was 4 percent in June 2022, down from 4.2 percent in May 2022, but still up from 3.4 percent in February 2020. The unemployment rate in June 2022 was lowest for workers in the following major demographic groups: **women** (3.4 percent), **white** (3.4 percent), **25 to 54 years old** (3 percent), and **55 years old and over** (2.8 percent). The unemployment rate was highest for workers in the following major demographic groups: **men** (4.5 percent), **Black** (7 percent), **Asian** (4.3 percent), **Hispanic or Latino/a/x** (5.6 percent), **16 to 19 years old** (14.2 percent), and **20 to 24 years old** (11.4 percent).

## **Background and Methodology**

On the first Friday of each month, the U.S. Bureau of Labor Statistics (BLS) publishes “The Employment Situation” news release, which presents national data from two surveys. The establishment survey provides an overview of nonfarm employment overall and by major sector. The household survey provides an overview of employment status (labor force participation rate, employment-population ratio, and unemployment rate) overall and by major demographic group. Later each month, the BLS’ Local Area Unemployment Statistics (LAUS) program provides state and local data from the above surveys and other sources. Like the national analysis, the state-level analysis includes an overview of nonfarm employment overall and by major sector. It also includes an overview of employment status overall. Unlike the national analysis, the state-level analysis includes no overview of employment status by major demographic group.

To fill the state-level analysis shortfall, which is essential for designing effective public policy in Connecticut and responding in a timely manner, Connecticut Voices for Children is publishing a monthly news release, “The Employment Situation in Connecticut.” This includes an overview of the change in total nonfarm employment in the U.S. and Connecticut as well as the change in nonfarm employment by major sector in Connecticut. It also includes an overview of employment status in the U.S. and Connecticut by major demographic group, which no other organization in Connecticut currently provides on a monthly basis. These new measures of employment status in Connecticut by major demographic group are calculated using the following methodology: The monthly estimate that the BLS provides for each overall employment status indicator in Connecticut (labor force participation rate, employment-population ratio, and unemployment rate) is multiplied by the employment status ratio for each major demographic group. The latter is calculated using the Economic Policy Institute’s publicly-available extracts of the BLS’ national household survey data for the preceding three-month period for Connecticut and its bordering states, New York, Massachusetts, and Rhode Island, which are the state labor markets most connected to Connecticut’s labor market. The expansion of the time period and the labor market area for calculating the employment status ratios for the major demographic groups is necessary to increase the sample size.

## Change in Total Nonfarm Employment, U.S. and Connecticut Seasonally Adjusted

Projected Recovery Date

U.S.: August 2022

CT: January 2024

Average Change in Nonfarm Employment, Past Six Months

U.S.: 456,667 (0.2%)

CT: 2,533 (0.1%)

Job Openings

U.S.: 11.3 million (May)

CT: 120,000 (May)

Unemployed Persons Per Job Opening

U.S.: 0.5 (Jun./May)

CT: 0.6 (Jun./May)

## Change in Nonfarm Employment by Major Sector & Industry, Connecticut Seasonally Adjusted

55 Years Old and Over	2.6	2.7	2.7	2.8	2.9	2.8

The **labor force participation rate** measures the percentage of the population that is working or actively looking for work. The **employment-population ratio** measures the percentage of the population that is currently working. The **unemployment rate** measures the percentage of the population that is unemployed and actively looking for work.
